

MATHEMATICS

$$\begin{array}{r} \xi \varepsilon \\ + \kappa \gamma \\ \hline \pi \eta \end{array}$$

Can you solve this problem?

Can you use the Ancient Greek number system to write:

1. your age?
2. the date of your birthday?
3. the number of people living in your house?
4. the number of children in your class?
5. the number of children in the school?
6. the age of a parent?
7. the number 550?
8. the number 443?
9. the number 824?

Can you work out how to use both of the number systems?

What other numbers can you write?

Can you write some calculations?

Which number system do you prefer?

Which do you find easier to work with?

Feel free to research further :)
