

HOME LEARNING

Week 3 - Monday 15th June - Friday 19th June 2020

Here is our 'Week 3 Nursery Home Learning Resource' with suggested activities to support a progression in your child's learning throughout the second half of the summer term.

Please feel free to adjust activities to fit your child's individual interests and continue to carry out other home learning activities as they arise in daily life and play. We will enjoy seeing how you are getting on, so please keep sharing your learning via Tapestry or email.

Choose one of the 'If and then' cards from the resources. Follow the instructions to complete the activity. 	Listen to the story 'Have you filled a bucket today?' by Carol McCloud. https://www.youtube.com/watch?v=JEg38zCOMgk  Can you be kind and lovely and fill a bucket each day this week?	Build a story den in the garden to create shade and enjoy endless stories together. Share Harry and his Bucketful of Dinosaurs by Ian Whybrow. 
Can you carefully complete some of the 'Harry and his bucketful of dinosaurs' pencil control activities? 	Use the story stones resource to create your own 'Harry and his Bucketful of Dinosaurs' story stones to retell the story. 	Can you complete the 'Harry and his Bucketful of dinosaurs' counting activity sheet and practise writing your numbers? 
Could you design your own bucket? You could use a real bucket at home or download the paper bucket to create a picture. Be as creative as you can. 	Use an old kitchen roll tube and craft it into something awesome. I cannot wait to see what you choose. Will it be a telescope, wand or princess? The possibilities are endless. 	Can you make a list together of all of the different ways you can think of to keep healthy and safe? This could include anything from holding an adults hand to cross the road to brushing your teeth well. 
Can you make a repeating pattern using some household items, for example fork, spoon, fork, spoon? 	Go on a technology hunt around your home. What can you find that needs to be plugged in and has buttons you can press to make it work? For example an iPad or washing machine.  Do we use any of these in school too?	Practise throwing and catching with different sized balls. See if you can move further apart from each other to make the game harder.
